

AKİF KEMAL AKSU

Senior Backend Developer (.NET & Microservices)

Senior Backend Developer with 6+ years of experience specializing in scalable microservice architectures and modern web technologies. Strong expertise in .NET Core, .NET Aspire, and distributed systems (Saga, Outbox patterns). Experienced in performance optimization for high-traffic systems, event-driven architectures, and complex third-party integrations (SAP, payment providers). Designs reliable systems by effectively leveraging CI/CD pipelines, full-stack observability (LGTM stack), and container technologies.

Experience

Senior Backend Developer | Runibex Technology Group Mar 2024 — Dec 2025 · Istanbul

- Projects: Logosoft E-commerce System, Cylinda Global Service
- Distributed systems architecture: async communication over **RabbitMQ** using an Event Bus pattern integrated with **PostgreSQL**.
- Data consistency: distributed transaction management with **Saga** (State Machine) and **Inbox/Outbox** patterns.
- Observability & monitoring: **LGTM (Loki, Grafana, Tempo, Mimir)**; centralized metrics/trace collection with **OpenTelemetry** Collector and **Aspire**.
- Search & performance: Cut product and catalog search latency by ~70% by migrating to **AWS OpenSearch**, enabling full-text and faceted filtering across large catalogs.
- Object storage: implemented file/media storage and management on **AWS S3**.
- DevOps: **CI/CD** with **GitHub Actions**; code reviews and **SonarQube** PoC work.
- Security: authentication and authorization with **Duende IdentityServer (OAuth2/OpenID Connect)**.
- Legacy modernization: Modernized a legacy **ASP.NET MVC** and **SOAP** service layer, progressively migrating business logic toward the new microservice architecture.

Full Stack Developer | Tetris Solutions Apr 2022 — Feb 2024 · Istanbul

DRD Filo Kiralama Outsource

- Projects: Checklas Tire Integration, Corporate ERP System
- High-traffic microservices architecture: designed scalable async communication across services with **RabbitMQ** and **MassTransit**.
- DevOps & delivery: Standardized multi-environment deployments with **Jenkins** and **Kubernetes**, eliminating manual release steps.
- Database & ERP engineering: dashboard enhancements and critical bug fixes; performance optimization on the Logo invoicing database.
- SQL optimization: Cut execution time by ~50% on critical stored procedures by profiling and rewriting **T-SQL** logic and indexes.
- Performance & caching: Reduced primary database read pressure by ~40% by introducing **Redis** caching for hot-path data.
- SAP migration & integration: Led invoicing and accounting integration with **SAP** services, refactoring the legacy billing stack to align with SAP's API contracts.

Full Stack Developer | Crawler Karavan A.Ş.

Jun 2020 — Apr 2022 · Istanbul

- E-commerce & customer experience: built web platforms with multilingual support, dynamic quotations, order tracking, and end-to-end process management.
- **ERP & manufacturing module:** Designed a comprehensive module including hierarchical Product Tree (BOM) structures (finished goods, semi-finished goods, and raw materials), inventory/warehouse, and work order management.
- Production optimization: Automated **BOM** and weekly production planning; ensured supply continuity by auto-generating purchase requests when stock thresholds were breached.
- Database programming (**T-SQL**): automated business processes and optimized database-level business logic with **procedures, functions, and triggers**.
- Performance improvements: enhanced response times and efficiency for large datasets through **indexing** and **query optimization**.

Software Intern | İndis Yazılım

Jan 2020 — Feb 2020 · Kayseri

- Financial system design: designed an accounting system for tracking and reporting financial processes and integrated it with user-friendly interfaces.
- Mentorship & **SDLC**: Built foundational **SDLC** knowledge through structured mentorship and active participation in a live development cycle.

Software Intern | GameLab Istanbul

Jun 2019 — Jul 2019 · Istanbul

- Gameplay mechanics & optimization: contributed to gameplay feature development and performance improvements using **C++** and various game technologies.
- Debugging: Strengthened debugging skills by identifying and resolving defects in a shipped game codebase.

Projects

Logosoft E-Commerce System

Runibex Technology Group

- **General Purpose:** A high-performance, distributed platform managing large-scale B2B and B2C e-commerce operations.
- **Architecture:** Asynchronous microservices architecture via **RabbitMQ** with Event Bus pattern integrated with **PostgreSQL**.
- **Data Consistency:** Distributed transaction management with **Saga** (State Machine) and **Inbox/Outbox** patterns.
- **Observability:** **LGTM** (Loki, Grafana, Tempo, Mimir), **OpenTelemetry**, and **Aspire**.
- **Tech Stack:** **.NET Core**, AWS OpenSearch (Search), AWS S3 (Storage), Redis, Duende IdentityServer (Security).
- **DevOps:** Docker, Kubernetes, GitHub Actions, SonarQube.

Checklas Tire Integration Project

Tetris Solutions (DRD Filo Kiralama Outsource)

- **General Purpose:** A microservices-based solution automating tire management and supplier integrations in fleet leasing processes.
- **Architecture:** Scalable asynchronous communication infrastructure utilizing **RabbitMQ** and **MassTransit**.
- **Database & Performance:** T-SQL optimizations on MSSQL and Redis caching strategies.
- **Integration:** Invoice and accounting integration with SAP services.
- **DevOps:** CI/CD pipelines using Jenkins and Kubernetes.

Crawler Karavan Web Platform

Crawler Karavan A.Ş.

- **General Purpose:** A customer-centric web platform featuring multilingual support, dynamic quoting, and end-to-end order tracking.
- **Features:** Multilingual architecture, dynamic pricing engine, order management dashboard.
- **Tech Stack:** ASP.NET MVC, Entity Framework, MSSQL, HTML/CSS/JS.

Crawler Karavan ERP System

Crawler Karavan A.Ş.

- **General Purpose:** A comprehensive ERP module covering hierarchical Product Tree (BOM) structures (finished goods, semi-finished goods, and raw materials), inventory, and warehouse management to boost production efficiency.
- **Database Programming:** T-SQL structures (Stored Procedures, Triggers, Functions) automating business processes.
- **Modules:** Production planning, BOM management, automated purchase requests.
- **Performance:** Indexing and query optimization for large datasets.

Payment & Finance Management System

Independent Developer / Project Owner

- **General Purpose:** A comprehensive financial management system with real-time notification infrastructure, enabling companies to track income and expense flows efficiently.
- **Architecture:** Built with **Onion Architecture** (Domain, Application, Infrastructure, Persistence, Presentation).
- **CQRS & MediatR:** Separated commands and queries for readability and performance.
- **Financial Operations & Security:** Deposits/withdrawals, **JWT**-based authorization, **2FA**, and role-based access control (Admin, Accounting).
- **Tech Stack:** .NET, PostgreSQL, Entity Framework Core, Redis (Caching), SignalR (Real-time).
- **DevOps & Deployment:** Deployed on a **Hetzner VPS** in an **OpenVPN**-protected network; automated **CI/CD** with **Jenkins** and enabled continuous deployments to Test and Prod.
- **Monitoring & Logging:** Portainer, Yacht, Seq.

Education

B.Sc. — Computer Engineering · Erciyes University

2015 — 2020

Technical Skills

Architecture & Patterns

- Domain Driven Design (DDD)
- Onion Architecture
- Microservices
- Saga
- CQRS
- Outbox/Inbox
- SOLID
- Clean Code

Backend & Testing

- .NET / .NET Core
- ASP.NET MVC
- SOAP
- xUnit
- Moq
- RESTful API Design
- MediatR
- FluentValidation

Observability & DevOps

- LGTM Stack (Loki, Grafana, Tempo, Mimir)
- OpenTelemetry
- Docker & Docker Compose
- Kubernetes
- Nginx
- Jenkins
- GitHub Actions

Database & Data

- PostgreSQL
- MS SQL (T-SQL)
- Redis
- OpenSearch (AWS)
- Elasticsearch
- MongoDB
- Dapper
- Entity Framework Core
- AWS S3

Security

- Duende IdentityServer
- OAuth2
- JWT
- 2FA

Languages

Turkish (Native)

English (B1)

Certifications

Secure Software Development	BGA Security · 2024
Clean Code	Akın Kaldıroğlu · 2022
Design Patterns	Akın Kaldıroğlu · 2023
